

# 3 DEADLY MEDICAL SECRETS

**Your Doctor Could Lose His License If He Tells You These!**

**The three conversations in which your doctor can not participate with you.**

Most of us want to believe that our doctors are our friends. We cling to the thought that a downturn in our health will affect his day or change his plans for the evening. We want desperately to believe that this person who stands between us and death is consumed with curing our situation. But that is not the way it works.

For a great deal of us, kindly old Dr. Marcus Welby or the handsome Dr. Kildare still permeate our current beliefs about doctors, some 30 years later.

The truth of the matter is that today's doctors are not taught to heal or even attempt to heal any disease we might present him with. Today's doctors are taught primarily 2 things. One is pain management and the

other is disease management.

Curing diseases is no longer in his realm. He is now a portal to the world of pills and other pharmaceuticals which will teach you how to 'manage' whatever disease or ailment you have.

And that is the first no-no that doctors are not allowed to discuss with you under any circumstances.

If you ask your doctor, "Is there anything out there that will cure me of this disease?"

By law, he must say, "We have no cure, at this time." He is legally bound by law and the FDA to respond with those exact words. Even if he knows it is a lie.

If he were to discuss with you some of the alternative therapies that have been shown to shrink cancer tumors and in some cases shrink those tumors right out of existence, he would be subject to everything from harassment and threats of losing in medical license to jail.

They can do this because our government has passed laws which stipulate that only 'medicine' can cure disease and the only items which are considered as medicine are those produced by the big pharmaceutical companies.

The sad part of this equation is that pre-med and medical students are being taught that this is also absolute truth when, in fact, we know that only the body can cure disease. This is a medical and scientific fact that the drug companies have been slowly obscuring over the years.

## PART TWO

It seems that we continue to get dumbed down to the point where we will even accept lies because it is what we are told to believe and because it is the popular thought of the day. We accept and believe these lies even if they can kill us.

If you were to ask your doctor, “How long will I have to take these pills before I am cured”?

He will reply, “Your condition can not be cured, what we will do is use these pills to manage your disease and keep you from suffering”.

Managing diseases is the new cure. And here we come to the second no-no that doctors can not tell you the truth about, curing diseases.

In all honesty, I do not think we have cured anything since polio in 1952. And even after we had a viable cure for Polio, two doctors on either side of the planet in late 1950 poisoned a batch of Salk's vaccine in New York which sickened 250 and killed 11 children.

They then let the world know that they were racing toward a 'better' cure. One of the doctors, Kaprowski, began testing on mentally ill children. When it was discovered he was forced to quit but he was not prosecuted. The other doctor, Saben, worked within the USSR his native country where he vaccinated millions.

Kaprowski chose the Belgian Congo for his tests.

When Kaprowski was informed by Saben that he had tested his vaccine and found an unknown virus in it, Kaprowski responded by ending their friendship.

Many believe this strange new 'virus' inside Kaprowski's polio vaccine was the beginning of the AIDS pandemic in that very same region 30 years later.

Dr. Hilary Kaprowski, even today, denies that there was any live virus present in his vaccine.

There has been no attempt lately by the pharmaceutical industry to cure diseases because they have realized that there is no money in a cure.

AIDS, Cancer, Diabetes are three of the most notorious diseases of our time and even though the American Cancer Society has been in the business since 1948 and has raised billions of dollars for cancer - they are no closer to a cure than they were when they first started over 70 years ago.

Your doctor can not talk with you about cures that involve alternative therapies. He can only tell you about how to ‘manage’ your particular disease and teach you how to ‘live with’ your particular ailment. This information should shock and outrage us, but it usually just falls into the realm of things that just make sense, when it shouldn’t.

Essentially we are being used by the big pharmaceutical companies to explode their bottom line. We must live with debilitating diseases so that their share-owners can make a dollar.

To make matters worse is that your doctor is well-versed in teaching you to claim your disease. He does not refer to it as cancer, it is ‘your cancer’. He does not call the health-savenger diabetes by its name, he calls it ‘your diabetes.’ And he teaches you to do the same.

Whether you are a Christian or a Universal Citizen (Bob Proctor, The Secret, the movie) follower you have learned that we call into being situations, circumstances, people and things in our lives.

No one thing exists in our physical world that was not once a thought. Once that thought was verbalized, that thing, whatever it is, came into being as a living verifiable truth.

For as long as you claim ownership to a disease, you will possess it.

Be careful of your words. They shape your future.

## PART THREE

When we take a critical look at our world we begin to understand that there are forces which control our lives over which we seem to have no power.

We look around and find that many, many things that impact our ability to survive have been placed into the safekeeping of others.

Most of these things we just accept as being an inevitable part of life.

Things like paying four times the cost of a house to the bank. This is after the house has been built and all parties involved have received their compensation for building the house. Yet, when we approach the bank to buy the house, we are charged anywhere from 5 to 10 times the cost of actually building the house.

When we seek to start a business, we are obligated to pay local, state and federal fees and taxes before we can sell our first widget.

And when we endeavor to retire, we find that all of our money is in someone else's hands or that our retirement funds are being managed by other corporations and that our social security is embroiled in a fight for its own life, even before we see a dime of it.

All of these things we just accept as a part of life. We don't ask anyone to explain them. We don't demand that they be changed because of the inherent problems they cause for us. And we don't insist that our laws be changed so that we can live a less complicated life. We just accept them.

The one thing we shouldn't accept. The one thing we should shout from the rooftop, though, is for reform over our health system.

In America, and other countries who are following our lead, our health system is made up of a government that works for pharmaceutical companies and pharmaceutical companies who work for a profit. Our governmental officials who should work for us are beings used as pawns in a deadly game that allows pharmaceutical companies to ride roughshod over them and push inferior drugs onto us, the unsuspecting public.

Doctors are routinely compensated by the pharmaceutical companies to write prescriptions for their drug-of-the-month. The free samples that your doctor hands out to you may seem like a good thing but it is just a clever marketing ploy by the pharmaceutical companies.

And now we come to the third no-no that your doctor can not discuss with you.

If you were to say to your doctor, “How long has this medicine you are prescribing for me been studied? How long has it been on the market?”

He is bound by his duty to the pharmaceutical company NOT to divulge

this information. And there is no law on the books that compels him to do so either.

This is an attempt to hide the fact that most new medications have their Stage Four testing done on an unwitting public, namely you and me.

If your doctor prescribes you a new medication that has been on the market for less than seven years, you are the guinea pig.

The pharmaceutical companies allow that there is an acceptable number of people who will be sickened and possibly die from every new medical 'miracle' they cook up, and our government agrees that they may experiment on us in this manner.

So don't be deceived.

Your doctor does not work for you.

And your health is not his primary concern in life. But it should be yours.

Because there is a simple and effective method that you can use to get healthy and stay healthy for life.

## PART FOUR

There is a therapy on the market right now today, that has been used for over 100 years by doctors in Europe, Belgium and Denmark.

This therapy is so effective that Dr. Christiaan Neethling Barnard (Nov. 8, 1922 - Sept. 2, 2001) the South African cardiac surgeon, famous for performing the world's first successful human-to-human heart transplant was a proponent of using oxygen therapy. He stated that he has used it for years personally and would recommend it for anyone who wanted to live a healthier life which was free of disease.

Dr. Barnard made this statement in March of 1986. He said that he was taking H<sub>2</sub>O<sub>2</sub> and water several times daily to reduce arthritis and ageing. He had been recommending it highly at the time. His conversion came about when he found some heavily reviewed medical articles on H<sub>2</sub>O<sub>2</sub> therapy, some dating back to the 1800s.

In support of him, Walter Grotz has been touring and lecturing extensively on the benefits of self-administering oxygen therapy, literally saving hundreds of lives wherever he goes, and bringing hope to people who had been told their cases were hopeless.

Dr. Kurt W. Donsbach at the Bio-Genesis Institute in Rosarita Beach, Baja Mexico (Tel: 0011-1-619-428-8585) has achieved a remission rate exceeding 70% in over 300 patients, at last count, most of whom had been previously told they were beyond hope, and had 'tried everything else'.

#### **"OXYGEN THERAPY"**

***The two basic types of oxygen therapy are ozone blood infusion and absorption of oxygen water or hydrogen peroxide at very low concentrations.***

***It turns out that the AIDS virus, like other virus, cannot tolerate high oxygen levels in its victims' blood. Not only that, every other disease organism, tested so far, apparently has the same weakness.***

***Even cancer growths contract and disappear when the oxygen saturation is sufficiently increased in the fluids surrounding them, since these growths are anaerobic.***

The facts go on and on supporting this inexpensive therapy. But because it is so cheap and readily available, the pharmaceutical companies have no interest in pursuing it as a viable alternative to their pills with their massive and sometimes deadly side-effects.

But you can.

You can take charge of your own health and rid yourself of a life of pill-popping, disease, and medical dependency.

Get more information [here](#).

Then make an informed decision to live healthy and grow old gracefully.
